

## BS-PKN

# Ball protection cover for analogue clocks

- + Plexiglas cupola
- + Crystal clear ball protection unit made of acryl glass (PMMA)
- + Especially suitable for protection of analogue clocks up to 40 cm diameter of series B and T
- + Weather-proof and resistant to age
- + Elastic, limited shock-resistant
- + Immune to scratches compared to other thermoplasts
- + Resistant against acids and bases of middle concentration (exempt from ethanol, acetone and benzol, i.e. no cleaning with alcohol or solvents)

### Technical specifications:

Size:	48 cm diameter
Thickness:	4 mm
Refraction index:	1.492 (for comparison: 1.45 ... 1.9 at mineral glass)
